Revenue Management System & Price Optimiser

Powered by **HSDS**

Algorithm powered

Cloud based

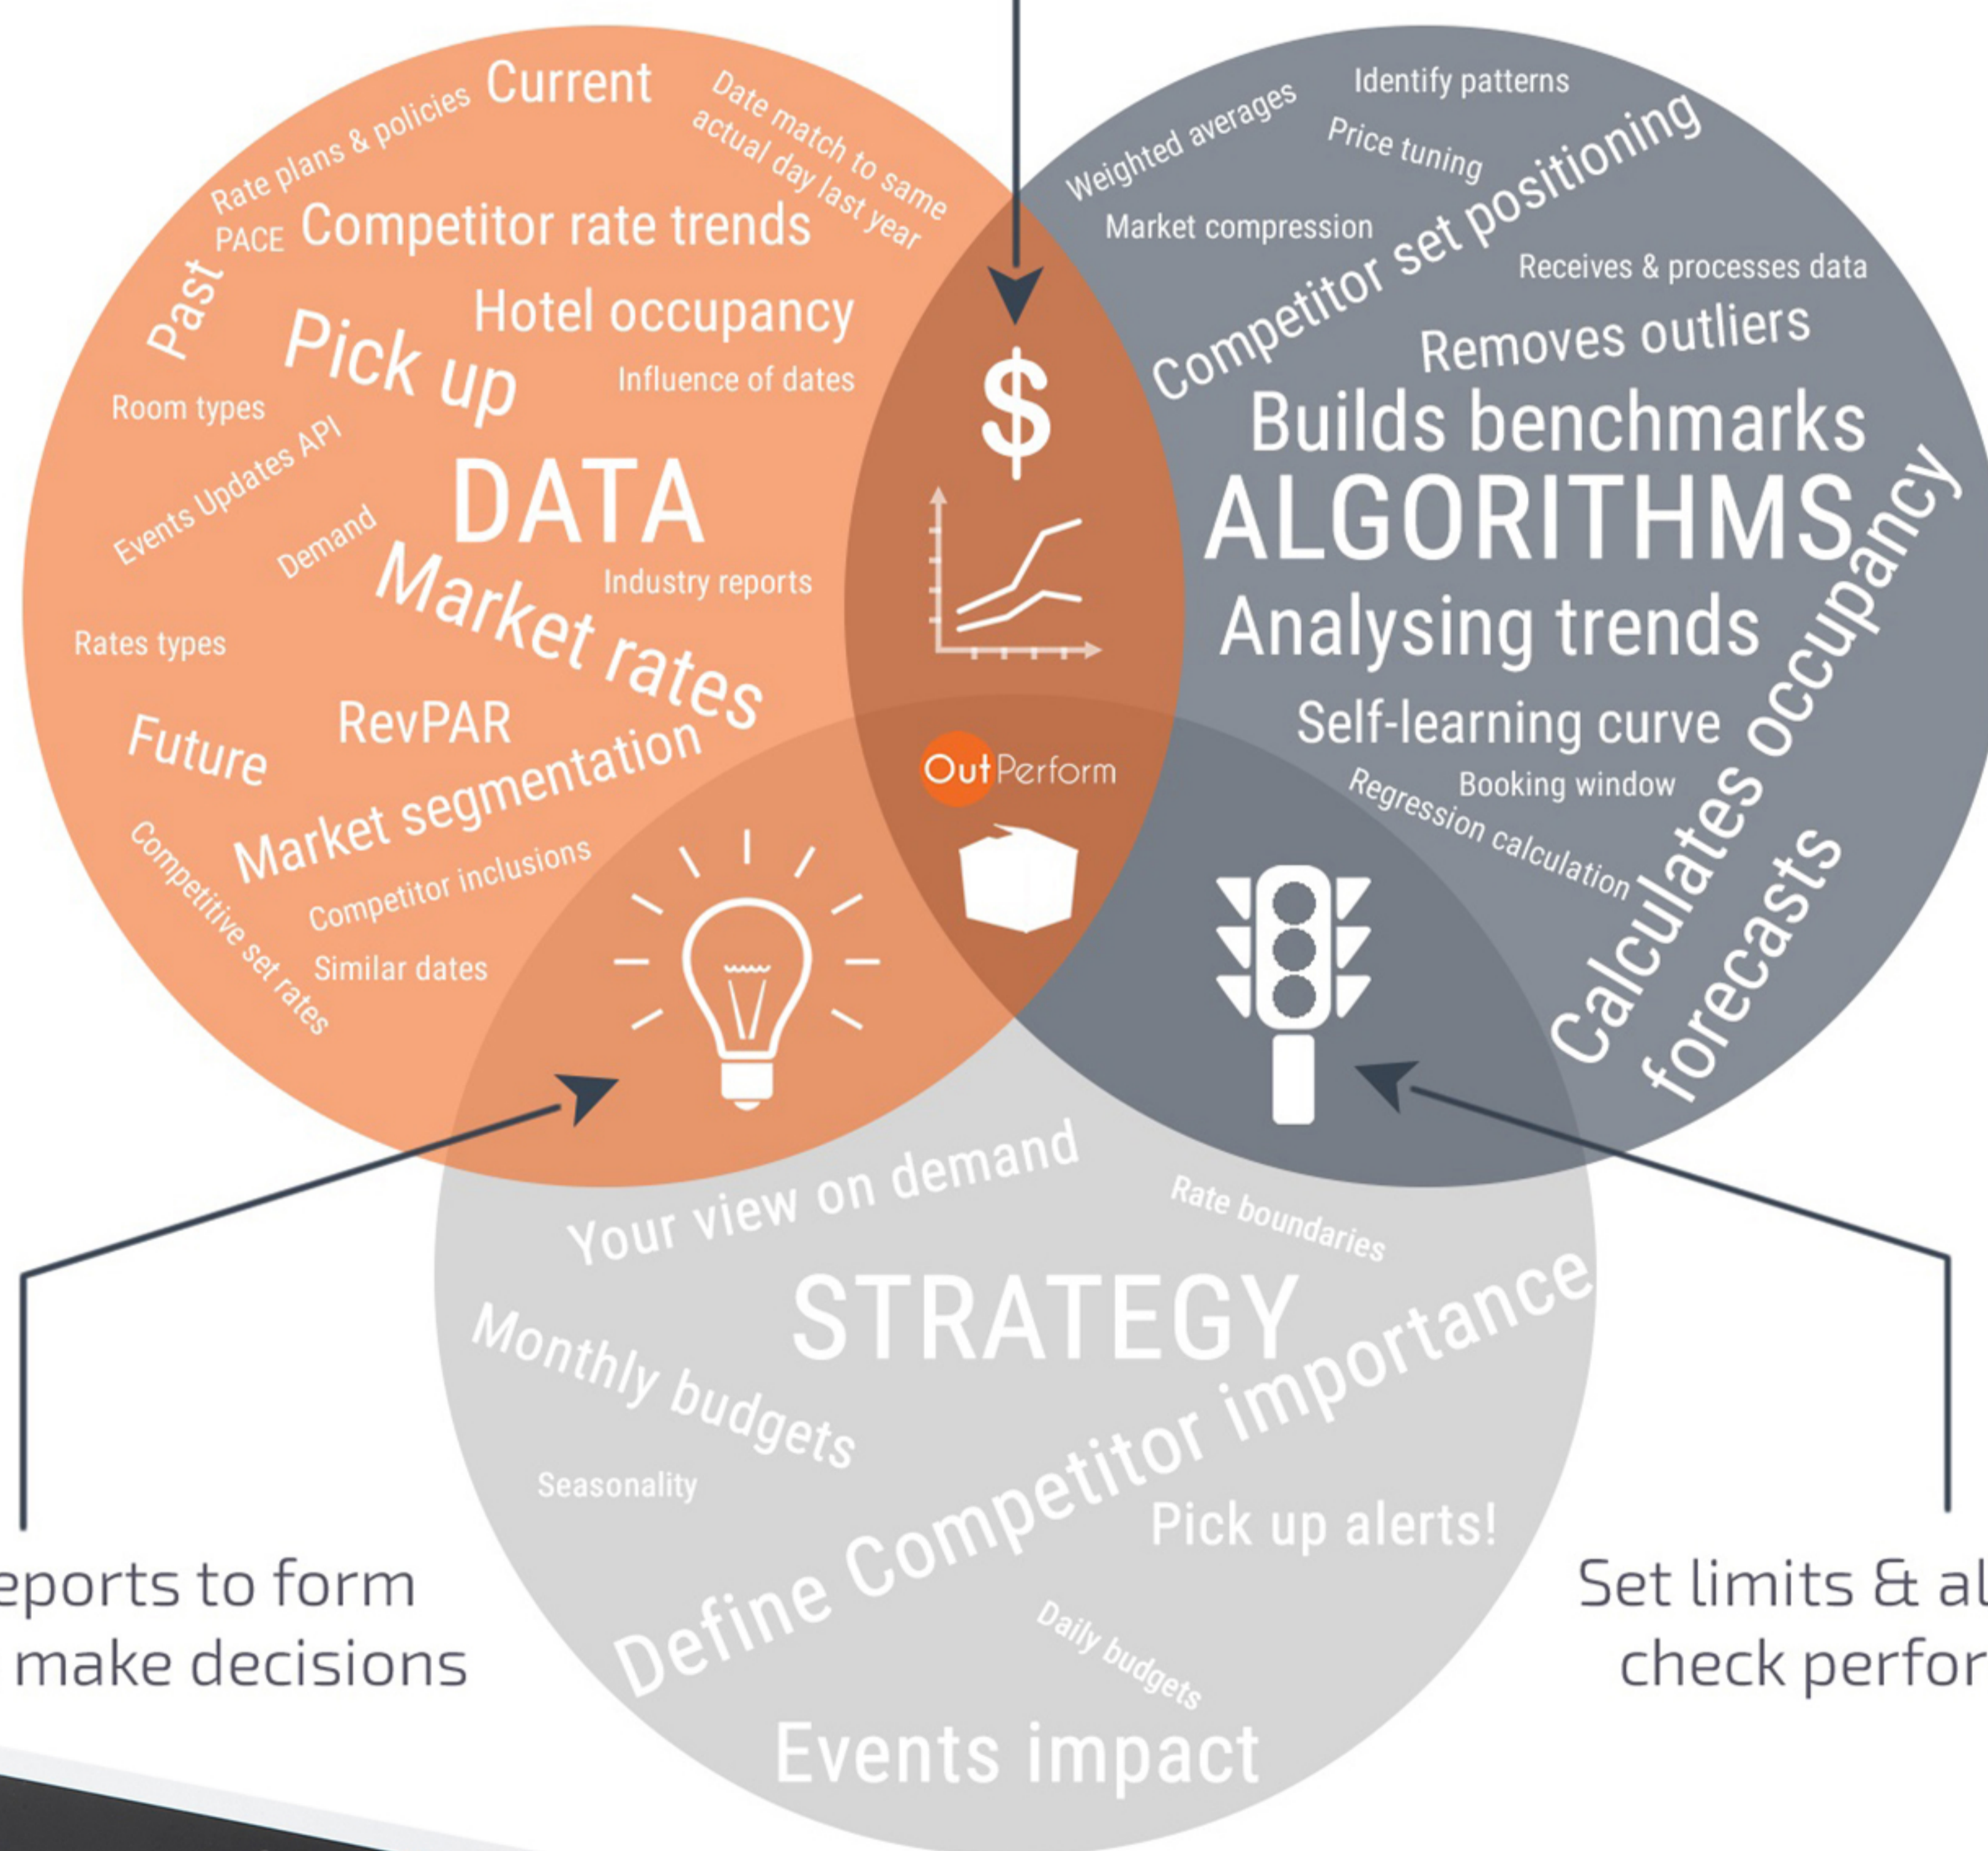

Responsive design

Save time

Improve RevPAR results

Optimizes prices & increase revPAR

PAST
CURRENT
FUTURE
DATA
In one place

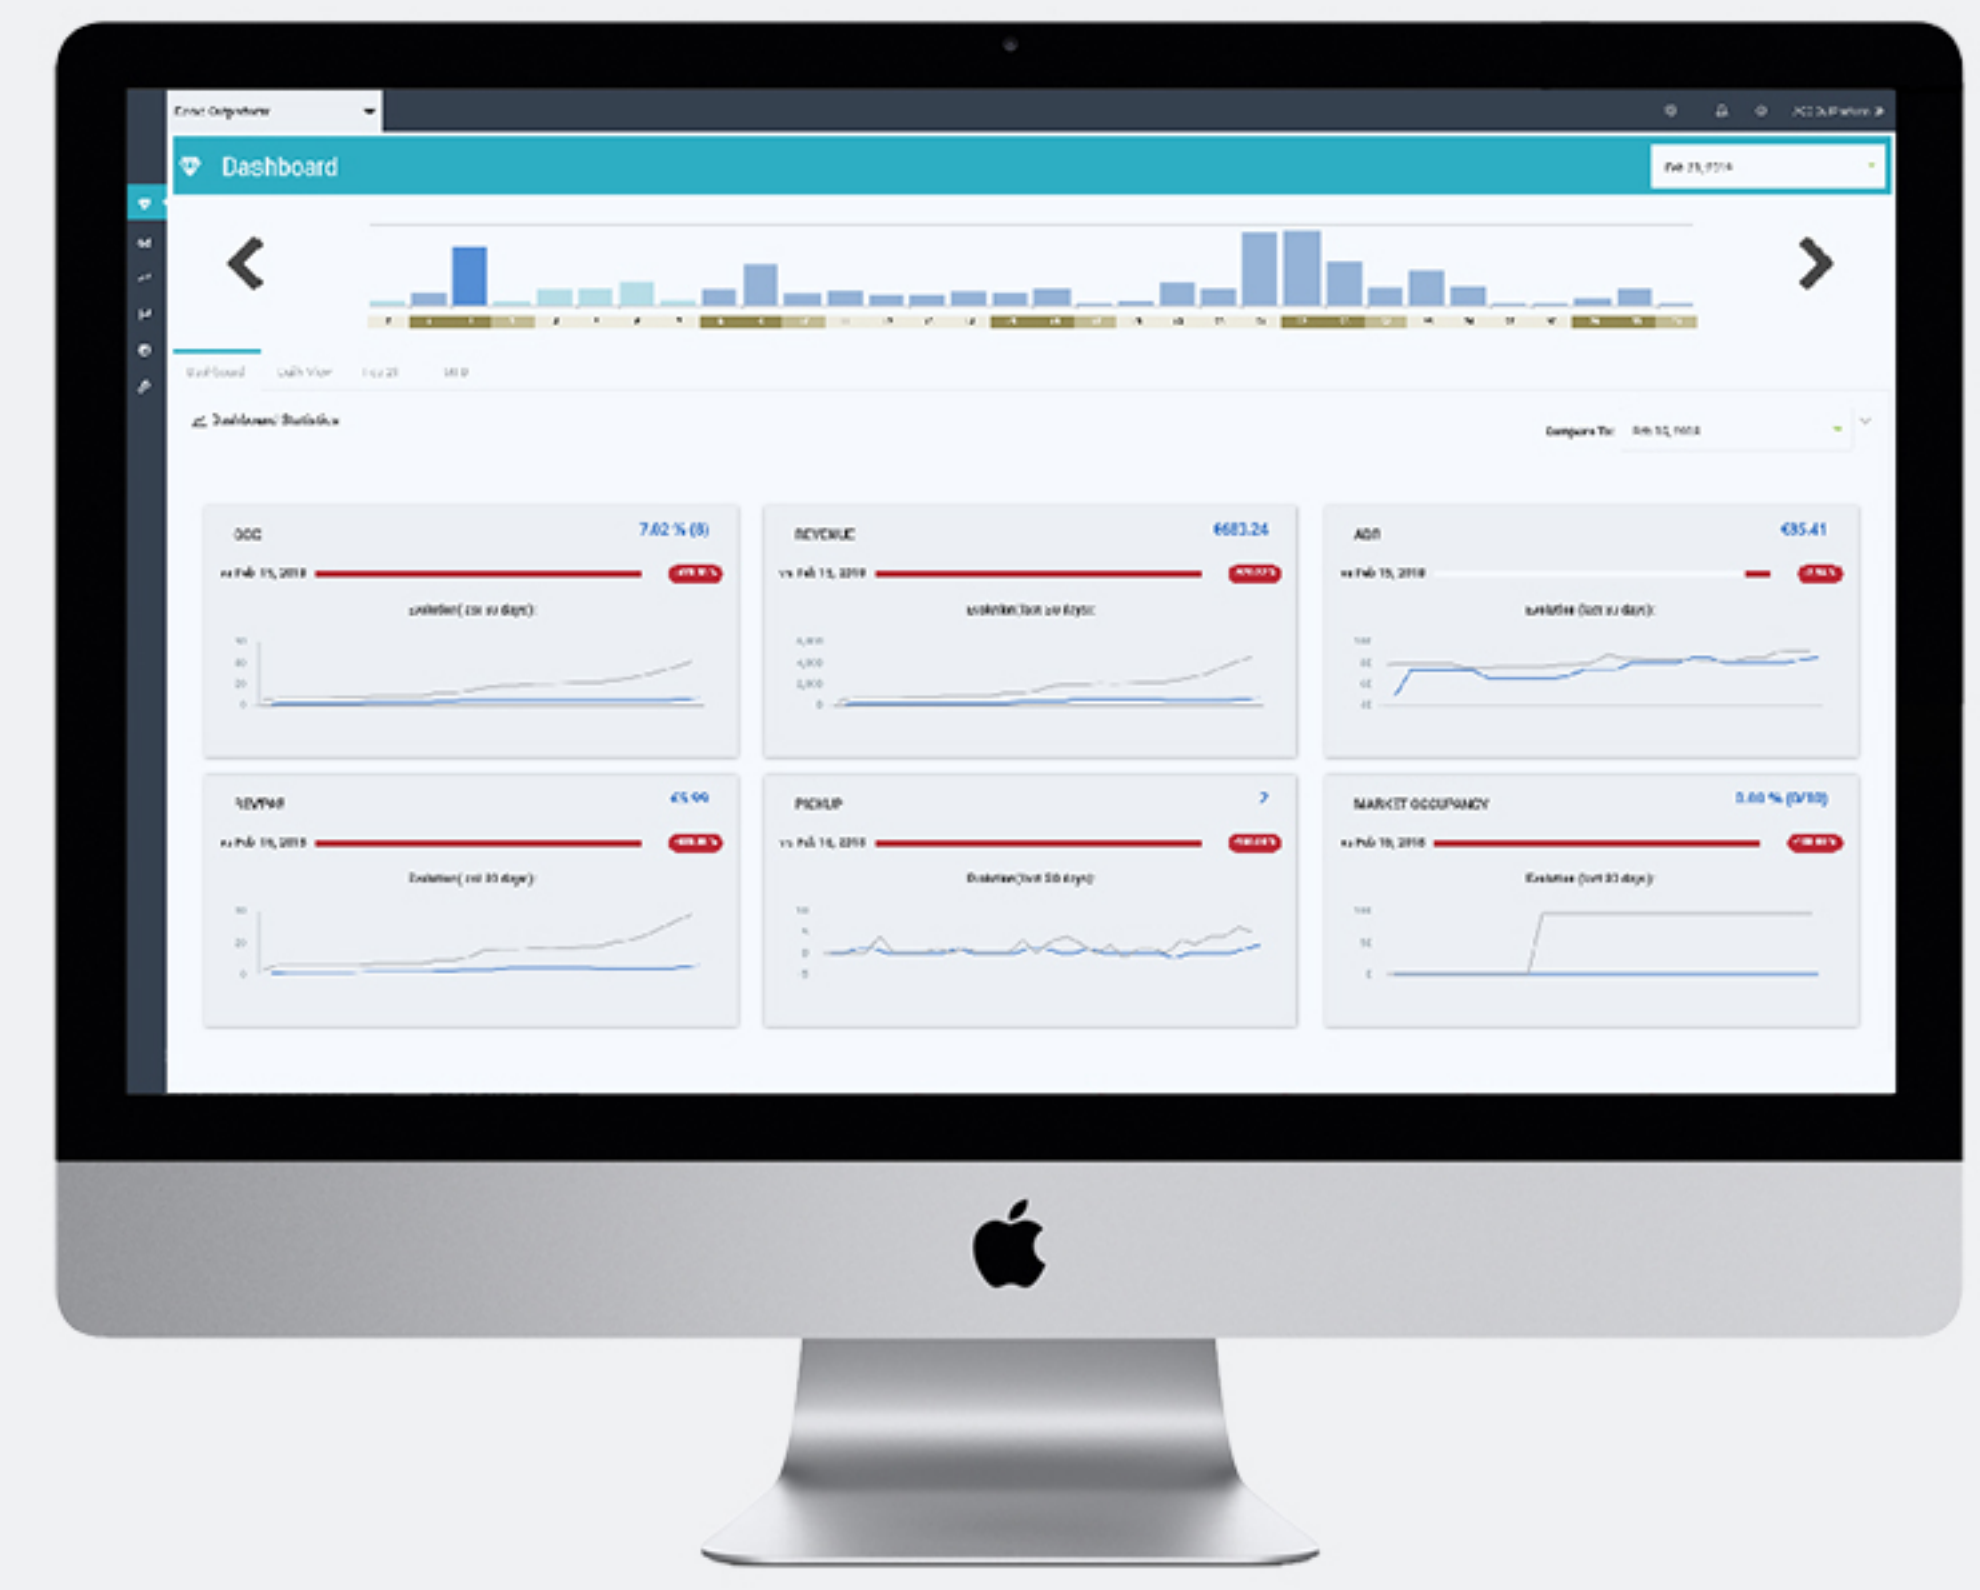

Easy to use

We make understanding lots of information really simple.

Because brilliant revenue management takes up so much time and is a very manual process – fragmented data from PMS, rate shoppers, channel managers and revenue optimizers, offline/online, sometimes past or current, not often future – this picture is incomplete, disconnected and not aggregated.

This is why we created OutPerform. Ideal way for the hotels and resorts to optimize their revenue.

Intuitive Dashboard

KPI's

- ✓ Occupancy
- ✓ Revenue
- ✓ Average Rate OTB
- ✓ Pickup
- ✓ RevPar
- ✓ Market Occupancy

 30 days evolution

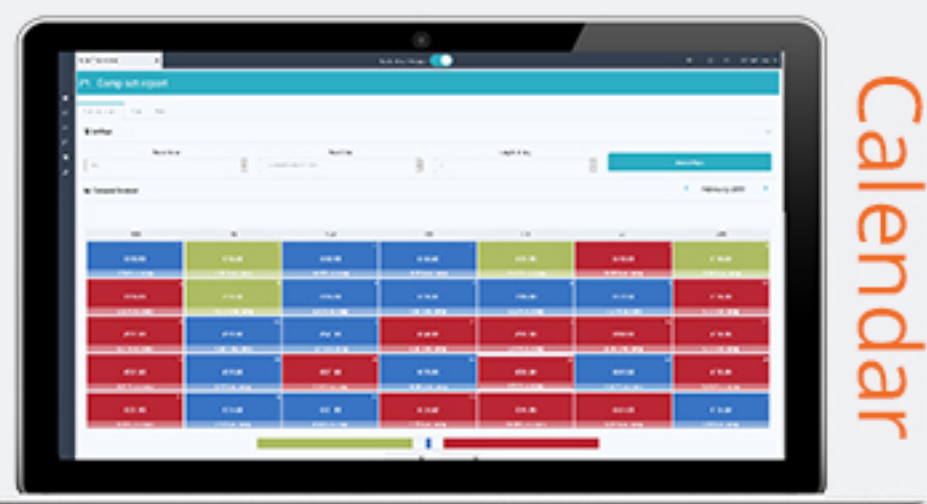

Market Informer

Individual Rate Shopper with different views
